***Location of Application***

1. The location of the subject application has changed. The subject application is now located in Group 1630, Art Unit 1634, and has been assigned to Primary Examiner Bradley L. Sisson.

***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to hybridization probe; and claim 11, drawn to a related kit.

Group II, claim(s) 6-7, drawn to a hybridization-based method of detecting.

Group III, claim(s) 8-10, drawn to a method for labeling a DNA by 3'-tailing with a terminal transferase.

Group IV, claim(s) 12, drawn to a method for preventing hybridization of a hybridization probe in which a nucleotide sequence comprising labeled nucleotides is added to a DNA to be labeled.

3. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The inventions of Groups I-IV are linked by the use of inclusion of nucleotides, e.g., deoxyinosine (claims 1, 2 and 9) that have weaker affinity of hydrogen bonding than do traditional nucleotides. Goldgaber et al., (US Patent 4,912,206) disclose at least one probe (Fig. 1; column 1) that comprises deoxyinosine nucleotides. Accordingly, the aspect of using nucleotides such as deoxyinosine in hybridization methods was known and does not constitute a special technical feature. Therefore, while the inventions are linked, they are not linked by a special technical feature and as such, they do not have unity of invention.

Art Unit: 1634

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley L. Sisson whose telephone number is (703) 308-3978. The examiner can normally be reached on 6:30 a.m. to 5 p.m., Monday through Thursday.
